

Over the Top Quilt and Design Order Form

(Please print and include with quilt)

Name: _____.

Address: _____.

Phone: _____.

Email: _____.

Quilt Description: _____.

Quilt Size: (*length*) _____ x (*width*) _____ = _____ *Total Square Inches*

1. Type of Quilting (Check one)

Custom. Starting at 3 cents per square inch. For example borders, blocks, ext. Call for a custom consultation.

Computerized Edge to Edge

Basic Density (price listed)

Medium to Small Density (add .5 cents psi)

Small Density (add 1 cent psi)

Budget Friendly 1.4 cent pattern

2. Batting (Check one)

100% cotton (96" wide)

80/20 cotton/poly (96" wide)

80/20 cotton/poly (96" wide)

50/50 cotton/bamboo (96" wide)

80/20 cotton/poly (120" wide)

Provide your own

3. Thread

Specific Color _____ Match to quilt top Use a contrasting color

4. Desired Pattern: _____.

5. Binding: (optional)

sew to front of quilt (6 cents per running inch) sew to back and machine quilt to front (12 cents per running inch)

6. Special Instructions:

Over the Top cuts excess batting and backing from quilt after top stitching at no extra charge. All cut off remnants are returned to you when you pick up your quilt. If you would not like this service please let us know. People using minky or plush backings are subject to a 6 cent per running inch charge to stabilize edges after quilting and to prevent the backing from stretching.

Pricing

Follow these steps to estimate the cost of your quilt (psi = per square inch)

1. Calculate the area of your quilt.

Multiply length x width in inches. (example: a throw quilt measuring 50" x 60" is 3000 square inches)

2. Multiply the area of your quilt by the price per square inch

(example: for a basic edge to edge quilting it would be \$.018 psi or $3000 \times 0.018 = \$54.00$)

Pricing varies depending on the complexity or density of the quilting pattern chosen.

Edge to Edge..... \$0.014 - \$0.025/psi depending on design and density

Custom..... \$0.03 psi and up call for consultation

3. Add the cost of batting and/or backing

I usually use the shortest side of the quilt to measure out batting. (example: for a quilt 50"x60" I would cut 55" of batting (five extra for quilting) so $55/40 = 1.375$ meters. I return all extra batting and backing to the customer.

-100% cotton (96" wide) - \$.15 per meter -80/20 cotton/poly (96" wide) - \$.12 per meter

-50/50 cotton/bamboo (96" wide) - \$.15 per meter -80/20 cotton/poly (120" wide) - \$.15 per meter

-Backing (email for styles 108" wide) - \$.18 per meter

5. Add optional binding charge.

Binding is offered at an additional charge.

6 cents per running inch to sew on the front for you to hand stitch to the back.

12 cents per running inch for me to sew onto the back and machine quilt to the front of the quilt

6. Add costs of extra services you desire and surcharges:

Piecing your quilt backing - \$10 per seam

Stabilizing the edge of finished quilt (mandatory for plush or minky backing). - 6 cents per running inch

7. Add optional shipping charges:

If your quilt needs to be shipped, you will be responsible to cover shipping fees/shipping insurance. There is no additional charge for local pick up.
